suissimage

Schweizerische Genossenschaft für Urheberrechte an audiovisuellen Werken
Coopérative suisse pour les droits d'auteurs d'œuvres audiovisuelles
Cooperativa svizzera per i diritti d'autore di opere audiovisive
Cooperativa svizra per ils dretgs d'auturs d'ovras audiovisualas

Appendix: Technical Requirements

We are able to process the following three formats for work registrations:

1. WRI (XML exchange format by AGICOA, adjusted format for authors possible)
    http://www.agicoa.org/english/rightsholder/wri.html
2. Suissimage Excel import format (only for minor amount of data, all functions)
3. IDA

1. WRI XML
Please use this exchange format as it covers all requirements of a work registration (numerous work data, precise claim definition, series and seasons structures as well as information on participants).

We kindly ask you for the following format enhancement: Please add a <Fct> tag in the <Rgt> block of your XML-file and specify the respective functions of rightholders consistently, cf. example below.

2. Excel
As last alternative we offer to process Excel files with a specific structure. If you choose this option, please get in touch with us. We gladly provide an Excel file template in which you can fill in your data.

3. IDA
If you are already registering with IDA we are able to extract your data by an IDA-database export.

With all formats it is indispensable that you provide **unambiguous** work identification numbers which will be **stable** over years. If you have more identification numbers in your database, you are requested to export them as well (IDA, ISAN, IPI, PPS Broadcast ID's, intern address-numbers, etc.).

Moreover, we ask you to add an explanation of the used internal abbreviations of type/genre categories as well as functions of participants to your work registration. For country- and language-codes use the ISO-standards.

In case your registration does not comply with our requirements, we will send you your registration back for correction of the format. We offer to do this task in-house; however, we will have to deduct the ensuing costs from your payment.

For technical questions, please contact Martin Hettich (martin.hettich@suissimage.ch)

WRI Format (extended)

This is an work registration example in the WRI format developed by AGICOA.
Format extention: SUISSIMAGE makes a distinction between the different claimant functions of, please add the tag <Fct> (marked in red below).
